

Fungai Dengu is General Surgery Registrar/Resident in Oxford and currently a Clinical Research Fellow working towards a DPhil/PhD at the University of Oxford. He did his undergraduate medical training, including an intercalated BMedSci (Hons) degree (Neurosciences) at the University of Edinburgh qualifying in 2012. He completed his Foundation training in Edinburgh during which he obtained membership of the Royal College of Surgeons Edinburgh (RCSEd). He went on to complete his Core Surgical Training (CST) in London at Kings College Hospital and the Royal Free Hospital before being appointed as Specialist Registrar on the Oxford Higher Surgical Training (HST) programme in 2016. He has recently commenced his DPhil research in the field of 'Normothermic Machine Preservation' (NMP) of organs for transplant under the supervision of Professor Peter Friend. He has a keen clinical interest in Vascular Access surgery and applications of novel technology in access and transplant surgery. He is also a surgical tutor for undergraduates at the University of Oxford and member of Oxford Global Surgery Group with an interest in surgical system strengthening in LMICs.
