

Dr Tamara Jemcov is a Head of Nephrology department at Clinical Hospital Center Zemun (Belgrade, Serbia), with expertise in ultrasonography. She has been working as a vascular access coordinator for more than 10 years at University Clinical Center of Serbia (Belgrade, Serbia). In 2013, she obtained a PhD with her thesis titled "Correlation of the Physiological, Biochemical and Morphological Parameters and Outcomes of the Native Arteriovenous Fistulas for Hemodialysis". She was involved in the Serbian National Register of Vascular Access, who publish an annual report on vascular access for haemodialysis. Dr Jemcov is a member of ERBP's vascular access guideline development group, as well as a council member of the Vascular Access Society (VAS).
