

Dr. Lawson received his Medical Degree and a PhD in cell and molecular biology from the University of Vermont. He then completed a Postdoctoral Fellowship in Biochemistry and a residency in General and Thoracic Surgery and a Fellowship in Vascular Surgery at Duke University Medical Center. He is currently Adjunct Professor of Surgery and Pathology at Duke University and President and Chief Executive Officer of Humacyte. He was formerly Vice Chair of Research in the Department of Surgery at Duke University Medical Center, Director of the Vascular Surgery Research Laboratory, Clinical Trials in Vascular Surgery, and the General Surgery Research Residency Program. He is the co-author of over 120 journal articles on the topics of hemostasis, tissue engineering and vascular surgery and lectures internationally on these topics. Dr. Lawson's research has been funded by grants from the American Heart Association, National Institutes of Health, Department of Defense and various biotechnology companies.
