

I am a Vascular and Transplant Surgeon currently working as a Consultant in Vascular Surgery and in Centro de Acessos Vasculares (Vascular Access Center) of G.E.V. – Grupo de Estudos Vasculares, dealing with 20 dialysis private centers in the North of Portugal with 1,800 patients, performing vascular access creation, revision and treatment of complications. Since my graduation as Vascular Surgeon (1984), I dedicated a great deal of my activity to make vascular access for haemodialysis (HD) and kidney transplantation. Our group of G.E.V. is strongly investing in development of new surgical techniques and in publishing and presenting the results of our activity on international meetings. Since 2017 I am a Council Member of VAS.
